RE: Site Inspection, Gypsum Resource Development Inc., White Cap #8 Mine, S/015/047, Emery County, Utah

Date of Inspection: December 1, 1992
Time of Inspection: 11:30 a.m. - 12:00 p.m.
Conditions: Sunny, cold
Participants: Holland Shepherd, DOGM

I stopped very briefly at the Gypsum Resource Development, White Cap #8 project to check up on the progress. The site was initiated approximately 2 years ago as a gypsum quarry. The operator has been verging on the edge of 5 acres for a number of months now. In fact, the BLM considers this site a Plan.

In inspecting the site today, I determined that the site is still under the 5 acre limit. The site is currently active; they were hauling gypsum out today.

Summary and Conclusions:

The Division needs to follow up on periodic inspections of the site to ensure that the operator has not exceeded the 5 acre capacity. Other than that, the mine is status quo.
